

Fostering Academic Collaboration Across Europe

The ENHANCE Professional Tandems

The ENHANCE Professional Tandems initiative connects academic staff and doctoral candidates from ENHANCE Alliance universities to promote scientific cooperation and networking. Participants are paired based on shared research interests, facilitating interdisciplinary collaboration and knowledge exchange.

Fields of research and professorship include (but are not limited to):

- AI and Robotics
- Architecture
- Biotechnology and Biomedical Engineering
- Climate Change
- Civil Engineering
- Cybersecurity and Data Science
- Energy Conservation and Storage
- High Energy Physics and Experimental Techniques
- Innovative Didactics
- Material Engineering
- Material Technologies
- Photonic Technologies
- Smart City
- Social Sciences
- The Future of Ukraine

① The list of the fields is open and can be extended depending on the needs.

Join the Network!

- Express Interest by filling out your profile via the Professional Tandem registration form on the info page.
- Upon receiving your tandem partner's profile, organise your first meeting to commence your collaborative journey.

The ENHANCE Professional Tandem project is open to all academic staff and doctoral candidates affiliated with ENHANCE Alliance universities.
