

Join the ENHANCE mentor group!

We are looking for experts in business creation and sustainability to take part in helping university start-ups to grow. [Join!](#)

Startups will be offered **three thematic areas** of mentoring. Two of them will be 'elective' depending on the needs and development level of the startup.

The sustainability topic area will be part of the mentoring for each startup involved in the process.

There are many associated benefits to joining our mentoring network, including:

- The experience can inspire innovation and creativity for both mentees and mentors, bringing fresh perspectives to your everyday businesses.
- If you are new to mentoring, ENHANCE programme will give you the chance to develop an understanding of learning and sharing styles by asking the right questions in the right way.
- You will be able to connect with the community of innovators and mentors from seven European universities (Germany, Italy, Norway, Poland, Spain, Sweden).

What the programme will look like?

- The programme will be based on one-to-one sessions between mentors and startups.
- Programme duration: end of September – November, 2 months.
- Communication between participants will take place on Discord.

**Deadline for application:
10th August 2024**

Idea validation

Some of our start-ups are at the beginning of their journey. They need special attention and support in validating their business ideas or achieving successes such as their first "real" customers.

Sustainability

Sustainable development concerns everyone on our planet. We want to enable our companies to develop in line with these challenges but also to open up the prospects that the Sustainable Development Goals hold for societies.

Internatiolization

One of the biggest challenges for start-ups is to go beyond their own market. Advice in this area is intended to reduce the risks associated with finding the most effective path in this matter.

Enhance mentoring programme is coordinated by Warsaw University of Technology – Innovation Centre. For more information please contact **Ms. Eliza Nowacka**
