## Areas of discussion for FP10

- EU - **strong position in advanced manufacturing and materials**, industrial R&D (automobile, information and communication technology, and in health sectors).
- EU - should **reduce dependencies** in AI, big data, cloud computing, cybersecurity, secure communications, robotics and micro-electronics.
- **Reinforcement** of ERC and PILLAR 1/Research infrastructures.
- **Reform** of EIT (possible integration with EIC)
- **Research Infrastructures** to become transversal to all the PILLAR of the new program
- Reflection on a dedicated **Work Programme** for dual use research.
- Reinforcement and expansion of the program to the wide countries (ERA- European Research Area/Science diplomacy).
- **Knowledge Valorization** (EIC/ Technological Transfer and Infrastructure)
- Enhancing **research security** →
